

SYNTHESE LOCKING COMPRESSION PLATE SYSTEM DRYLAB

Saturday 8 September 2007

Faculty: Jörg Auer (CH), Don Hulse (USA)

The original internal locking system which revolutionized internal fixation both in humans and in animals.

The increased stability and the unique features of this system widen the clinical applications of internal fixation.

14.30

Welcome, faculty introduction, information about the Course

14.40

Principles and biomechanics of LCP; implants and instruments

15.15

Clinical application in SA

15.45

Clinical application in LA

16.15

Coffee break

16.30

Drylab Session: practical exercises with plastics bones

17.30

Discussion

18.00

End of the Course
